

## Doing health math

Do you ever look at the Nutrition Facts labels on the packaging of food you buy at the store? Why or why not?

### Try this

Look at the sample Nutrition Facts label below. Think about or talk about your answers to these questions:

1. What kinds of things can you find out about the food from reading the label?
2. What does % Daily Value mean?
3. How do you know if you are getting enough daily vitamins from your food?
4. How do you calculate how many calories you are eating?
